### Objective

GOL'14 (Logistics Operations Management) aims at bringing together researchers and professionals interested in logistics not only from a technology standpoint but also from a social sciences perspective. This multi-disciplinary approach examines the current state of the art focusing on new techniques and models relevant to the operations management of various logistics flows. Conference's scope covers themes such as logistics systems modelling, decision support systems, information systems, legal and regulatory environments, framework and control of the global logistics chain, organization of manufacturing, transport and storage operations, performance modelling and measurement, and, risk analysis and planning.

### Best papers will be proposed to journals for publication as for example:

- INFOR: Information Systems and Operational Research
- La Revue Française de Gestion Industrielle
- IJAL: International Journal of Applied Logistics

### Topics of interest include, but are not limited to

- Supply chain design and control
- Transportation, manufacturing & warehousing operations
- Maritime and Port logistics
- Performance analysis
- Modelling & simulation
- Planning and scheduling
- Information systems integration
- Traceability
- Risk Management
- Regulations, Governance
- Sustainable development
- IT for Supply Chain Management and logistics
- Reverse logistic
- Complex Systems
- Logistics process
